

KorinWell Electronics Product Catalog

Jan 2020

About Us

KorinWell Electronics is a privately held, specialized designer and manufacturer of passive circuit products for wireless communication market.

KorinWell Electronics can supply an extensive line of microwave components with industry leading performance including power splitters, directional couplers, power tappers, hybrid couplers and RF loads. These products are employed as system components in commercial applications such as cellular wireless base stations, in-building wireless signal distribution, Security Wireless Coverage (Bands down to 380 MHz).

Features

- **High Voltage Breakdown**
- **Choice of N or 7-16 mm connectors**
- **Moisture Sealed for outdoor use**
- **Rugged & Reliable**
- **High Power, Low Loss, Low VSWR**
- **Key Products Available from Stock**
- **Low Passive Intermodulation**
- **Bracket for pole or wall mounting available**
- **36 Month Warranty on All Components**

TABLE OF CONTENTS

Low Power Splitters	1
120-240MHZ, N-Connectors, 2 Ways	1
300-500MHZ N-Connectors, 2, 3 & 4 Ways	2
800-2500MHZ N-Connectors, 2, 3 & 4 Ways	3
Multi-band Low Loss Reactive Power Splitters	4
1700-2500MHZ N-Connectors, 2, 3 & 4 Ways	4
800-2500MHZ N-Connectors, 2, 3 & 4 Ways	5
800-2500MHZ DIN-Connectors, 2, 3 & 4 Ways	6
700-2700MHZ DIN-Connectors, 4 Ways	7
Directional Couplers, Low-Loss Stripline Coupler	8
120-240MHZ, 6 & 10dB N-Connectors	8
300-500MHZ, 6-30dB N-Connectors	9
800-2500MHZ, 5-20dB N & 7/16 Din-Connectors	10
800-2500MHZ, 25-30dB N & 7/16 Din-Connectors	11
3dB Hybrid Coupler/Combiner	12
120-240MHz, N Connectors, 30dB Isolation, Minimum	12
300-500MHz, N Connectors, 35dB Isolation, Minimum	13
800-960MHz, N & 7/16 Din-Connectors, 35dB Isolation, Minimum	14
800-2500MHz, N & 7/16 Din-Connectors, 25dB Isolation, Minimum	15
1700-2500MHz, N & 7/16 Din-Connectors, 30dB Isolation, Minimum	16
Network Combiner	17
4X4 Hybrid Matrix, Combiner & Splitter, 800-2200MHz, N & 7/16 Din-Connectors	17
Multi-Band Low Loss Power Tappers	18
Unequal Power Splitters, 800-2500MHz, N-Connectors	18
Coaxial Loads, Low & Medium Power Terminations	19
DC-6000MHz, 50ohms	19
TERMS AND CONDITIONS	20

Low Power Splitters
120-240MHZ, N-Connectors, 2 Ways

- 50Watt Average Power
- 20dB Isolation, Min
- Minimal RF Insertion Loss
- High Reliability
- Environment IP65
- N Female Connectors

The BXSM series of Low Power Splitters is designed to evenly split power cellular signals with minimal reflections or loss. All of them are conformance to IP65 specification. Its mechanical shape allows to be fixed on the wall or the pole easily.

This device allows use with antennas and leaky cable systems and wireless base stations.

VSWR:	1.20:1 Max.
Power Rating:	50W, Avg
Isolation:	20dB min
Impedance:	50 ohm
Temperature, C	-25° to +75°
Environment:	IP65, RoHS compliant
Housing:	Passivated Aluminum or powder paint
Connectors:	N (f) tri-plate
DC capability:	DC transmission only between all ports

PN.	Frequency Band, MHz	Split	Insertion Loss dB Max	Split Loss, dB	Weight, g
BXSM-2-NFB	120~240	2	0.3	3	625

Low Power Splitters

800-2500MHZ N-Connectors, 2, 3 & 4 Ways

- Multiple-Band Frequency Range, Cellular, PCS, UMTS
- 50Watt Average Power
- 20dB Isolation, Min
- Minimal RF Insertion Loss
- High Reliability
- Environment IP65
- N Female Connectors

The BXSM series of Low Power Splitters is designed to evenly split power cellular signals with minimal reflections or loss. All of them are conformance to IP65 specification. Its mechanical shape allows to be fixed on the wall or the pole easily.

The ultra wide frequency range allows use with multi-band antennas and leaky cable systems and wireless base stations.

VSWR:	1.20:1 Max.
Power Rating:	50W, Avg
Isolation:	20dB min
PIM, Passive IM:	-140dBc, 2x43dBm
Impedance:	50 ohm
Temperature, C	-35° to +75°
Environment:	IP65, RoHS compliant
Housing:	Passivated Aluminum or powder paint
Connectors:	N (f) tri-plate
DC capability:	DC transmission only between all ports

PN.	Frequency Band, MHz	Split	Insertion Loss dB Max	Split Loss, dB	Weight, g
BXSM-2-NF	800-2500	2	0.3	3	240

Multi-band Low Loss Reactive Power Splitters

1700-2500MHz N-Connectors, 2, 3 & 4 Ways

- Multiple-Band Frequency Range
- 300Watt Average Power
- Low Insertion Loss
- High Reliability
- Environment IP65
- N Female Connectors

The BXS series of High Powers Splitter is designed to evenly split power cellular signals with minimal reflections or loss. Its reactive design employs no resistors eliminating their contribution to PIM and the potential of their damage. Designed with only screw joint and an air dielectric, the PIM and loss has been minimized and reliability enhanced. All of them are conformance to IP65 specification. Its mechanical shape allows to be fixed on the wall or the pole easily.

The ultra wide frequency range allows use with multiple-band antennas and leaky cable systems and wireless base stations.

VSWR:	1.2:1 Max.
Insertion Loss:	0.1dB, Max
Power Rating:	300W, avg; 1.5KW peak
PIM, Passive IM:	-150dBc, 2x43dBm
Input Impedance:	50 ohm
Temperature:	-35° to +75°
Environment:	IP65, RoHS compliant
Finish: Connectors:	N(f), Silver or tri-plate
Housing:	Passivated aluminum or powder paint
DC capability:	DC transmission only between all ports

PN.	Frequency Band, MHz	Split	Split Loss, dB	Weight, g
BXS-2-NFF	1700~2500	2	3	210
BXS-3-NFF	1700~2500	3	4.8	245

Multi-band Low Loss Reactive Power Splitters

800-2500MHz N-Connectors, 2, 3 & 4 Ways

- Multiple-Band Frequency Range,
Cellular, PCS, UMTS
- 300Watt Average Power
- Low Insertion Loss
- High Reliability
- Environment IP65
- N-female Connectors

The BXS series of High Powers Splitter is designed to evenly split power cellular signals with minimal reflections or loss. Its reactive design employs no resistors eliminating their contribution to PIM and the potential of their damage. Designed with only screw joint and an air dielectric, the PIM and loss has been minimized and reliability enhanced. All of them are conformance to IP65 specification. Its mechanical shape allows to be fixed on the wall or the pole easily.

The ultra wide frequency range allows use with multiple-band antennas and leaky cable systems and wireless base stations.

VSWR:	1.2:1 Max.
Insertion Loss:	0.1dB, Max
Power Rating:	300W, avg.; 1.5KW peak
PIM, Passive IM:	-150dBc, 2x43dBm
Input Impedance:	50 ohm
Temperature:	-35° to +75°
Environment:	IP65, RoHS compliant
Finish: Connectors:	N (f), Silver or tri-plate
Housing:	Passivated aluminum or powder paint
Mounting:	Bracket for wall mounting included in the scope of supply.
DC capability:	DC transmission only between all ports

PN.	Frequency Band, MHz	Split	Split Loss, dB	Weight, g
BXS-2-NF	800~2500	2	3	380

Multi-band Low Loss Reactive Power Splitters

800-2500MHz DIN-Connectors, 2, 3 & 4 Ways

- Multiple-Band Frequency Range, Cellular, PCS, UMTS
- 700Watt Average Power
- Low Insertion Loss
- High Reliability
- Environment IP65
- 7-16 DIN Female Connectors

The BXS series of High Powers Splitter is designed to evenly split power cellular signals with minimal reflections or loss. Its reactive design employs no resistors eliminating their contribution to PIM and the potential of their damage. Designed with only screw joint and an air dielectric, the PIM and loss has been minimized and reliability enhanced. All of them are conformance to IP65 specification. Its mechanical shape allows to be fixed on the wall or the pole easily.

The ultra wide frequency range allows use with multiple-band antennas and leaky cable systems and wireless base stations.

- VSWR: 1.2:1 Max.
- Insertion Loss: 0.1dB, Max
- Power Rating: 700W, avg; 1.5KW peak
- PIM, Passive IM: -150dBc, 2x43dBm
- Input Impedance: 50 ohm
- Temperature, C: -35° to +75°
- Environment: IP65, RoHS compliant
- Finish: Connectors: 7/16DIN(f), Silver or tri-plate
- Housing: Passivated aluminum or powder paint
- Mounting: Bracket for wall mounting included in the scope of supply.
- DC capability: DC transmission only between all ports

PN.	Frequency Band, MHz	Split	Split Loss, dB	Weight, g
BXS-2- DF	800~2500	2	3	1040

- Super Wideband Band Frequency Range, Cellular, PCS, UMTS & WiFi
- 300Watt Average Power
- Low Insertion Loss
- High Reliability
- Environment IP65
- N-female Connectors

This super wideband High Powers Splitter is designed to evenly split power cellular signals with minimal reflections or loss. Its reactive design employs no resistors eliminating their contribution to PIM and the potential of their damage. Designed with only screw joint and an air dielectric, the PIM and loss has been minimized and reliability enhanced. All of them are conformance to IP65 specification. Its mechanical shape allows to be fixed on the wall or the pole easily.

The ultra wide frequency range allows use with multiple-band antennas and leaky cable systems and wireless base stations.

VSWR:	1.2:1 Max.
Insertion Loss:	0.1dB, Max
Power Rating:	300W, avg.; 1.5KW peak
PIM, Passive IM:	-150dBc, 2x43dBm
Input Impedance:	50 ohm
Temperature:	-35° to +75°
Environment:	IP65, RoHS compliant
Finish: Connectors:	N(f), Silver or tri-plate
Housing:	Passivated aluminum or powder paint
Mounting:	Bracket for wall mounting included in the scope of supply.
DC capability:	DC transmission only between all ports

- 200Watt Average Main Line Power
- 20dB Isolation, Min
- Minimal RF Insertion Loss
- High Reliability
- Environment IP65
- N & Female Connectors

The BXDC series of Directional Couplers is a stripline design for indoor/outdoor applications. Units couple off a defined fraction of signal with minimal reflections or loss. All of them are conformance to IP65 specification. Its mechanical shape allows to be fixed on the wall or the pole easily.

These devices allow use with antennas and leaky cable systems and wireless base stations.

VSWR:	1.20:1 Max., All Ports
Isolation:	20dB Min.
Power Rating:	200W, avg.; 1.5KW peak
Impedance:	50 ohm, nominal
Temperature Range, C	-25° to +75°
Environment:	IP65, RoHS compliant
Housing:	Passivated Aluminum or powder paint
Connectors:	N (f), tri-plate
DC capability: DC transmission only between input and output

3dB Hybrid Coupler/Combiner
120-240MHz, N Connectors, 30dB Isolation, Minimum

- 200Watt Average Power Rating
- 30dB Isolation, Min
- Minimal RF Insertion Loss
- High Reliability
- Environment IP65
- N Female Connectors

The BXH series of 3dB Hybrid Couplers is designed to meet the special requirement of wireless market. It can combine two channels from different service supplier to a single antenna or distribution cable. This requires the termination of one output port in the 50 ohm and results in a 3dB loss in each signal. In situations where two similar feeds are required, for example an in-building application, both outputs may be used, eliminating the need for a termination and the 3dB loss. All of them are conformance to IP65 specification.

This device allows use with antennas and leaky cable systems and wireless base stations.

VSWR: 1.20:1 Max. All Ports
 Coupling: 3dB, nominal
 Coupling Variation: $\pm 0.5\text{dB}$
 Impedance: 50 ohm, nominal
 Temperature Range, C: -25° to $+75^\circ$
 Environment: IP65, RoHS compliant
 Housing: Passivated Aluminum or powder paint
 Connectors: N (f), tri-plate
 DC capability: DC transmission only between cross ports

PN.	Frequency Range, MHz	Input Isolation dB Min.	Insertion Loss dB Max.	Power Rating W Avg.	Weight g.

- Environment IP65
- N & 7/16 Din Female Connectors

The BXH series of 3dB Hybrid Couplers is designed to meet the special requirement of wireless market. It can combine two channels from different service supplier to a single antenna or distribution cable. This requires the termination of one output port in the 50 ohm and results in a 3dB loss in each signal. In situations where two similar feeds are required, for example an in-building application, both outputs may be used, eliminating the need for a termination and the 3dB loss. All of them are conformance to IP65 specification.

The wide frequency range allows use with multi-band antennas and leaky cable systems and wireless base stations.

VSWR:	1.20:1 Max. All Ports
Coupling:	3dB, nominal
Coupling Variation:	±0.3dB
Impedance:	50 ohm, nominal
Temperature Range, C	-25° to +75°
Environment:	IP65, RoHS compliant
Housing:	Passivated Aluminum or powder paint
Connectors:	N (f), 7/16 Din tri-plate
DC capability:	DC transmission only between cross ports

PN.	Frequency Range, MHz	Input Isolation dB Min.	Insertion Loss dB Max.	Power Rating W Avg.	Weight g.

Network Combiner

4X4 Hybrid Matrix, Combiner & Splitter, 800-2200MHz, N & 7/16 Din-Connectors

- Connects 4 input to 4 output for shared system
- High Isolation, low VSWR
- High Average power rating
- Low PIM
- High reliability
- N or Din female connectors

The hybrid is a matrix of four 3dB hybrid couplers arranged. Signals applied to any of four input port will be split equally between four output ports. Because of symmetry, multiple signals in the same wireless band can be combined to common feeder cable, as might be required in a system shared in-building distributed antenna system. Unused ports must be terminated externally in 50ohm.

The hybrid provides excellent isolation in the wireless bands and minimize passive intermodulation(PIM). All of them are moisture sealed for outside applications. They are conformance to Ip65 specification.

Impedance: 50 ohm, nominal
 Temperature Range, C -25° to +75°
 Environment: IP65, RoHS compliant
 PIM, Passive IM:: -140dBc, 2X43dBm
 Finish:
 Housing: Passivated Aluminum or powder paint
 Connectors: N (f), 7/16 Din tri-plate
 PIM < -150dBc to special order

Multi-Band Low Loss Power Tappers

Unequal Power Splitters, 800-2500MHz, N-Connectors

- Multiple-Band Frequency Range, Cellular, PCS, UMTS
- 200Watt Average Power Rating
- Minimal RF Insertion Loss
- High Reliability
- Low Passive Intermodulation (PIM)
- Environment IP65
- N Female Connectors

The BXT series of power tappers unevenly split high power cellular signals from 5dB to 50dB with minimal reflections or loss over the whole 800-2500MHz band. Designed with only screw joint and an air dielectric, the PIM and loss is minimized and reliability enhanced. All of them are conformance to IP65 specification. Its mechanical shape allows to be fixed on the wall or the pole easily.

The ultra wide frequency range allows use with multi-band antennas and leaky cable systems and wireless base stations.

Power Rating:	200W, avg. 1.5KW peak
PIM, Passive IM:	-150dBc, 2x43dBm
Impedance:	50 ohm, nominal
Temperature Range, C	-25° to +75°
Environment:	IP65, RoHS compliant
Housing:	Passivated Aluminum or powder paint
Connectors:	N (f), tri-plate

DC capability: DC transmission only between input and port P1
P2 is coupled capacitive.

BXT- (20-50)-NF

Coaxial Loads, Low & Medium Power Terminations DC-6000MHz, 50ohms

KorinWell™

- Resistive Film Load
- Finned Termination
- Ideal for Wireless Communication
- Powers 2W to 50W
- VSWR to 1.15:1
- High Reliability

The BXL series terminations are medium power coaxial loads, which operate from DC to 6GHz. Cooling fins minimize temperature rise of the resistive film terminating element, contained within a carefully matched housing.

Standard connectors are N and 7-16 mm DIN, male or female.

Impedance: 50 ohm, nominal
Peak power, kW 5 peak
Temperature Range, C -35° to +125°
Finish

Connectors:

Inner Layer: Silver Plate

Outer Layer: Tri-plate

Housing: Black oxidation

TERMS AND CONDITIONS

QUOTATIONS

Unless otherwise specified, all quotations are valid for a period of 60 days subject to change based on availability of materials at order inception.

HOW TO ORDER

When placing an order, please include the model number, product description, frequency range and shipping instructions. If possible, the purchase order should refer to KorinWell quotation number or any reference subjects.

ACCEPTANCE OF ORDER

Orders can be placed either by fax or attached document by e-mail. KorinWell will confirm the receipt of all orders by sending the proforma invoice within 3 working days.

TERMS OF PAYMENT

All prices are F.O.B. Nanjing unless otherwise specified. Full payment in advance by wire transfer is required. KorinWell will confirm the delivery date immediately when the notification of the payment is confirmed by the banker.

SHIPPING

All shipments will normally be made by air freight, KorinWell will choose the most appropriate courier or freight forwarder unless otherwise specified by the customer when placing the order.

CHANGE ORDERS AND CANCELLATIONS

Change in orders regarding price, quantities, delivery or other conditions will be effective after mutual agreement had been affirmed in written document between the customer and KorinWell.

Cancellation of any accepted order can only be made after written consent of KorinWell. All cancellation will be dependent upon customer's agreement to satisfy all costs incurred by KorinWell and its proportionate profit on all work complete. KorinWell will endeavor to stop work promptly upon notification of cancellation.

WARRANTY

KorinWell warrants all products to be free of defects in material or faulty workmanship for a period of 36 months from invoice date. The warranty does not apply to products that have been disassembled, modified, physically or electrically damaged or of misuse.

RETURN ON MATERIAL

Material returned for rework or replacement shall be in accordance with the terms and conditions set forth under the warranty. Complete information should be provided with the shipment giving a detailed description of the reason for the products returned, date and number of original purchase order, the products model and serial number and the address to which the material is to be reshipped. KorinWell will issue RMA (Returned on Material Acceptance) to the customer as the confirmation and guideline of returning process.

Material returned as defective and found to meet the original specifications will be subject to a normal handling to cover the cost of reinspection and retesting.
